

#1. Largest Number

```
list1 = [43, 55, 72, 12, 9, 376, 121]  
list1.sort()  
print(list1[6])
```

#2. Second Largest Number

```
print(list1[5])
```

#3. Merge Two List

```
list2 = [4, 17, 95, 23, 47, 11, 61]  
combined_list = list1+list2  
combined_list.sort()  
print(combined_list)
```

#4. Swap First and Last Value

```
first = (combined_list[0])  
last = (combined_list[-1])  
combined_list[0] = last  
combined_list[-1] = first  
print(combined_list)
```
